Part III DETAILED ACTION

Response to Amendment

1. Applicant's arguments filed 1/31/94 have been fully considered but they are not deemed to be persuasive. The applicant argues that Whittington does not teach nor suggest replacing two concurrent signal samples with a sync symbol, however as stated in the rejection, the Whittington teaches a data link for cellular radio systems which replaces eight identical bits with a like number of synchronization bits and whether it is eight bits or two bits being replaced, the scope of the invention does not change. The applicant in his remarks, does ^{not} add any new evidence that would that in the examiner's view would set the claimed invention over the prior art.
